

**Can-Air**

# Mega X2 Diffuser

*Industrial Diffuser*

## ***Product Features***

- 100% designed & assembled in Canada
- Industrial grade, stainless steel base and stand
- One of the largest and lightest diffusers - no specialized equipment required for installation
- Uses patented quality fine-bubble airline
- Long lifespan with continued high performance
- Cost effective rebuilds — every 10 years
- Unique 16-point manifold for uniform air distribution and a wide operating range
- Self-righting diffuser when thrown in water
- Ships 95% assembled

## ***Specifications***

- Dimensions: 37.0" x 37.0" (0.94 m x 0.94 m)
- Weight: 19.0 lb (8.6 kg)
- Diffuser surface area: 1,314.0 sq in. (0.84 m<sup>2</sup>)
- 344.0" of 1.0" fine-bubble airline
- Airline burst pressure: 80.0 PSI above ambient
- Operating range: 4.3 – 20.0 CFM
- Optimal operating range: 5.0 – 13.0 CFM

## ***Why The Mega X2 Diffuser?***

The Mega X2 is the largest hand-held diffuser offered by Can-Air. Boasting an impressive 344" of fine bubble airline, this diffuser tops the competition in size, efficiency, price, and accessibility.

This industrial grade diffuser is made with stainless steel components to withstand the industrial wastewater. With sixteen air release points, this diffuser distributes air equally throughout its anti-fouling aeration airline. This unique Can-Air design also creates a wide operating range allowing it to be used in various applications.

Paired with Pond Pro's CA-Series compressors, the Mega X2 diffuser is an unbeatable option for aerating any sized lake or lagoon.

## ***Why Pond Pro?***

With over 20 years of experience designing and installing de-icing and aeration systems across Canada, we have perfected our Can-Air equipment to be the most easy-to-use, efficient, and reliable on the market. Pond Pro's experts can customize systems for any aeration or de-icing application!
